

Optimizing costs, pricing, promotions and sales

Maximizing margins in food manufacturing is a complex operation impacted by the weather, special events and competitor activity. Food manufacturers capture vast amounts of information throughout the supply chain to gain insight, control and predictability using Microsoft Dynamics 365, Azure machine learning and Power BI that turn data into actionable intelligence.

1

MAKING MARGINS IN **FOOD MANUFACTURING** REQUIRES BALANCING **COSTS, PRICING, PROMOTIONS** AND **SALES**

PREDICTIVE ANALYTICS PROVIDES UNPRECEDENTED VISIBILITY INTO **THE FOOD MANUFACTURING SUPPLY CHAIN**

2

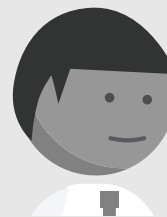

3

MANUFACTURERS DESIGN **PRODUCTS** USING PRECISE DATA ABOUT **COST, NUTRITION, ALLERGENS** AND **TRACEABILITY**

PREDICTIONS ABOUT **WEATHER, EVENTS, DEMOGRAPHICS** AND **COMPETITORS** ENABLE MANUFACTURERS TO SET **PROMOTIONS** BASED ON **DATA TRENDS**
